

**Laboratory Activity**  
**Web Systems and Technology**  
**Midterm**

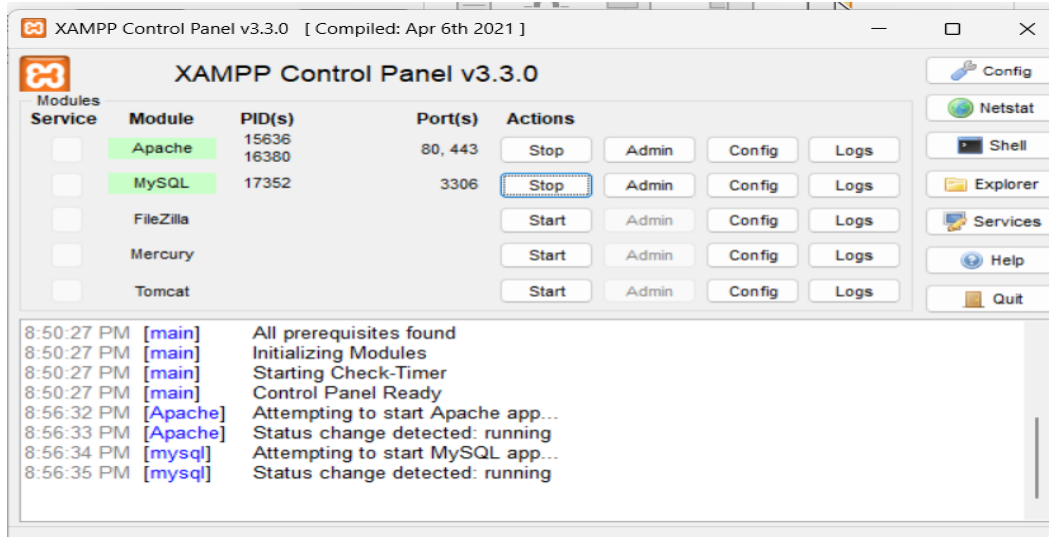

Procedure:

- Open the XAMPP control panel (see image)

Make sure to click the Start button  
to open the Apache and MySQL

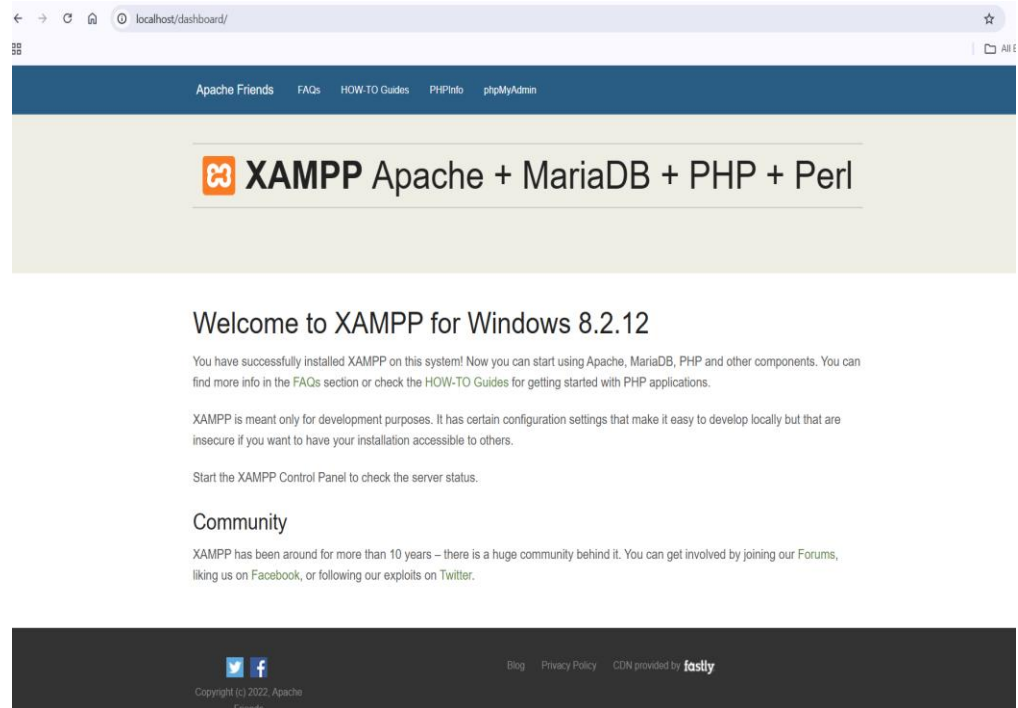

- Once it green your server is now running

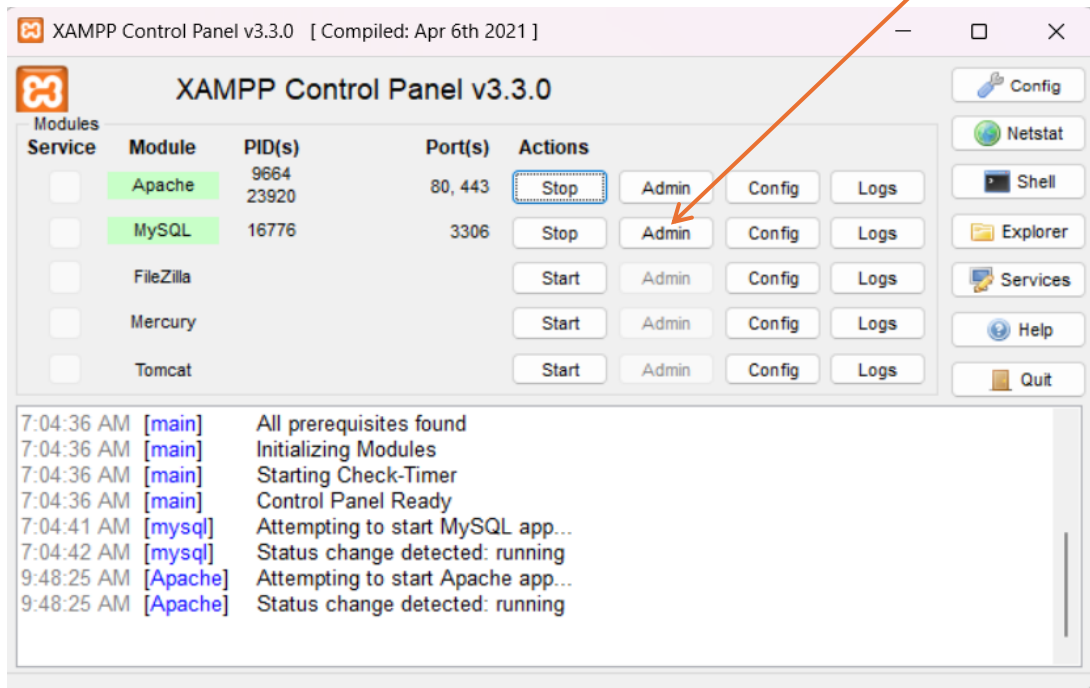

- Make sure to check the ports of Apache and MySQL as follows

Module	PID(s)	Port(s)
Apache	26368 3028	80, 443
MySQL	25340	3306

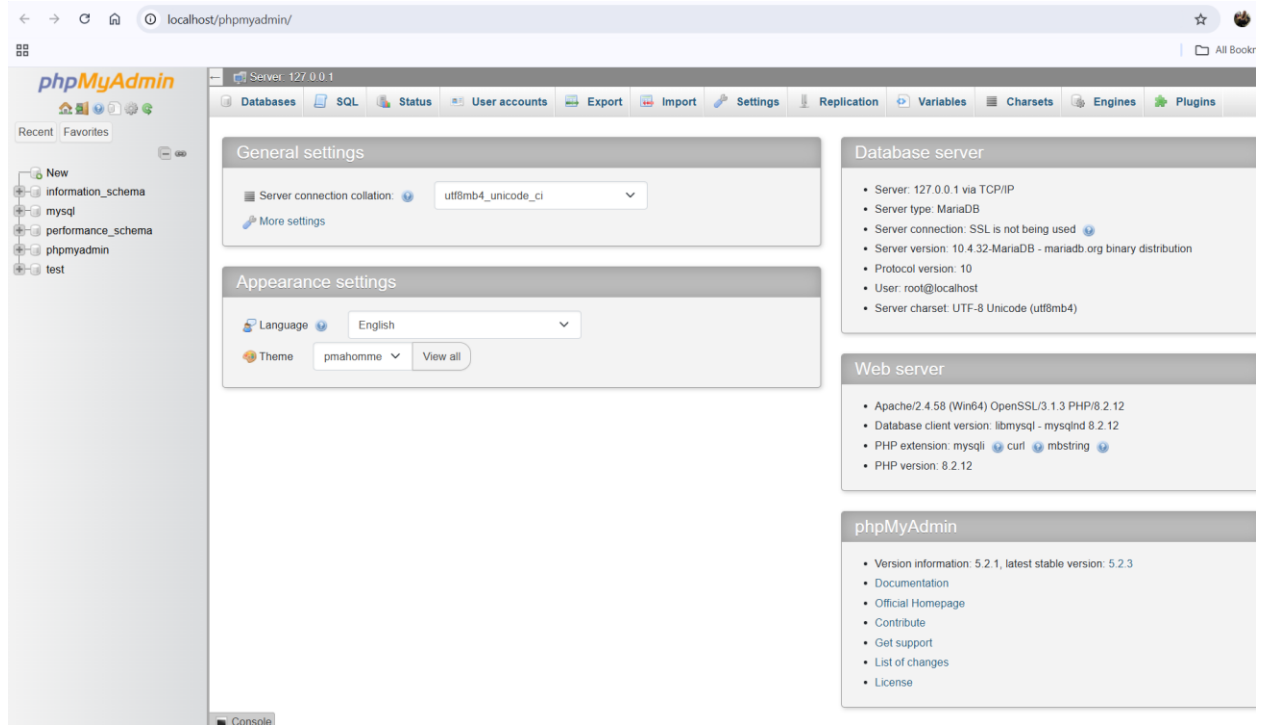

- Your now ready to test your server
- Access the XAMPP dashboard in a browser
  - Open your preferred web browser and type `http://localhost` into the address bar and press **Enter**.
  - If XAMPP is working correctly, you will see the XAMPP welcome page, which confirms the Apache web server is running.

- Alternatively, you can type `http://127.0.0.1` to get the same result.
- Then go to your phpMyAdmin inside your XAMPP control panel (click ADMIN under MySQL)

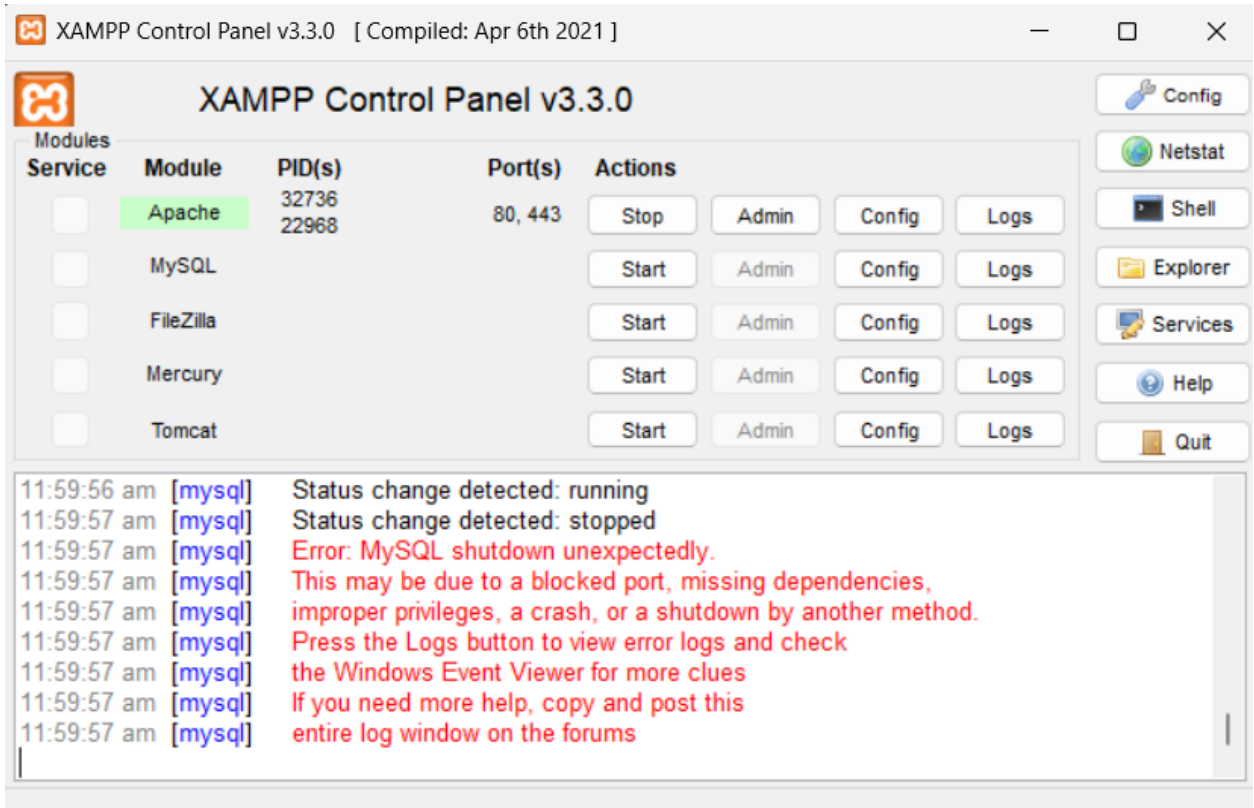

- Then it will redirect you to the admin panel

Once open do the following:

- I want you to explore or try to create a sample database as your activity for today.
- Name it on the desired name.
- Screenshot all your works and output in this document and sent it through your github (filename: Activity 3 -10/28 ) this is a different filename from your Activity 2.

## Finished sample database:
